## **Dentrix Enterprise, the EHR Incentive Program and Meaningful Use**

We understand that there is some confusion about how Henry Schein's practice management software, **Dentrix Enterprise**, works with the EHR Incentive Program in Massachusetts. We want to make sure that our position and plans are clear for eligible professionals.

The most recent **Dentrix Enterprise** version, **Dentrix Enterprise 6.5**, is not certified under the Office of National Coordinator (ONC) for Health Information Technology. However, Henry Schein has provided an ONC-certified product called **Dentrix Enterprise Meaningful Use Access** that allows **Dentrix Enterprise** users to apply immediately for the first year of the Electronic Health Record (EHR) Incentive Program and receive \$21,250 of incentive money if they meet all other requirements. This certified product will qualify eligible providers under the Massachusetts Medicaid and CMS requirements.

Henry Schein will also be releasing a fully certified EHR, **Dentrix Enterprise 7.0**, in the middle of 2013 that will qualify eligible providers using **Dentrix Enterprise** for meaningful use incentives in stage 1 year 2 and beyond. We are committed to meeting all future ONC certifications, including 2014, in order to provide our **Dentrix Enterprise** customers with the ability to receive all EHR Incentive payments.

If you have any questions with regards to our current products and future plans, please contact us at 1-800-983-5908 or visit us online at [www.dentrixenterprise.com/meaningful-use](http://www.dentrixenterprise.com/meaningful-use).

Sincerely,

Max Sessions  
Dentrix Enterprise Product Manager
